PROFESSIONAL SUMMARY

DevOps & Cloud Operations Engineer with hands-on enterprise experience at Vodafone Egypt, managing and optimising cloud and Linux infrastructure to enable seamless operations, high availability, and minimal downtime. Skilled in monitoring, troubleshooting, and implementing industry-leading practices for cloud-based systems using Kubernetes, CI/CD pipelines, and Infrastructure as Code. **AWS Certified Solutions Architect – Associate** and **Kubernetes (KCNA)** certified, bringing a learning mindset, strong communication, and quick adaptability to fast-paced, multi-cloud client environments.

PROFESSIONAL EXPERIENCE

Vodafone Egypt – Fixed Networks

December 2025 – Present

Automation & DevOps Engineer

- **Cloud Operations & High Availability:** Engineer highly available Linux environments with automated failover strategies (Keepalived, Rsync), sustaining continuous server availability and minimising downtime across production services.
- **Monitoring & Troubleshooting:** Architected a centralised monitoring stack (Prometheus, Grafana) with logging and alerting, enabling proactive health checks and faster incident troubleshooting across development and production environments.
- **IaC & Automation:** Develop Python/Flask automation tools and apply version-controlled Infrastructure as Code practices to streamline delivery workflows and optimise operations across engineering teams.
- **CI/CD & Service Delivery:** Deployed and maintain a centralised Gitea server powering secure CI/CD pipelines for reliable application and infrastructure delivery.
- **Operational Support:** Provide direct support for Linux VMs and cloud infrastructure, resolving deployment and networking issues to improve overall reliability and performance.

Raya IT

August 2025 – October 2025

Cyber Security Intern (Professional Services)

- **Infrastructure Security:** Hardened infrastructure and secured access points by applying network security principles and Linux administration, in line with security best practices and compliance standards.
- **Application Delivery:** Configured load balancing and API routing to support reliable, highly available application traffic management and service delivery.

NTI (National Telecommunication Institute)

March 2025 – May 2025

DevSecOps Intern

- **Kubernetes Platforms:** Deployed microservices to Kubernetes clusters using strict network policies and pod security contexts for secure, compliant cloud-native operations.
- **Secure CI/CD Pipelines:** Built automated deployment pipelines integrating Jenkins, Trivy (container vulnerability scanning), and SonarQube (static code analysis), embedding security and quality standards into delivery.

TECHNICAL SKILLS

- **Cloud Operations & Infrastructure:** AWS, Cloud Administration, Cloud Infrastructure Optimization, Cloud Performance Monitoring, High Availability & Failover; adaptable to GCP and multi-cloud environments.
- **Containers & Orchestration:** Kubernetes, Docker, Microservices Architecture.
- **IaC, CI/CD & Automation:** Terraform, Jenkins, GitHub Actions, Git, Gitea.
- **Systems Administration:** Linux Internals & Troubleshooting, Bash Scripting, IAM & Secrets Management Concepts.
- **Observability & Security:** Prometheus, Grafana, Logging & Alerting, SonarQube, Trivy.
- **Programming & Databases:** Python (Flask), PostgreSQL, MySQL.
- **Professional:** Communication, Active Listening, Accepting & Acting on Feedback, Ownership, Teamwork, Analytical Problem-Solving.

EDUCATION

6 October University

Graduated: July 2023

B.Sc. in Electronics and Communication Engineering

GPA: 3.56/4.0 (Excellent)

- **Graduation Project:** VANETs (Vehicular Ad-hoc Networks).

CERTIFICATIONS

- **AWS Certified Solutions Architect – Associate (SAA)** — ID: ba5495f66fe64df59d2ad1b9dcd7ab2d
- **Kubernetes and Cloud Native Associate (KCNA)** — ID: LF-qfc5fr6jya

LANGUAGES & ADDITIONAL INFORMATION

- **Languages:** English (Fluent), Arabic (Native).
- **Military Status:** Completed.
